ABOUT ME

Curiosity-led thinker with a strong inclination toward growth, creativity, and purpose. Drawn to solving complex problems and creating meaningful impact through research, innovation, and the application of machine learning in real-world contexts.

EDUCATION

Galgotias College of Engineering & Technology

Bachelor of Engineering in Artificial Intelligence & Machine Learning (CGPA: 7.73)

2023 – Present

Greater Noida, Uttar Pradesh

Minor Degree in Project Management

Sanskaar International School

2021 – 2022

Class XII (Percentage: 85%)

Prayagraj, Uttar Pradesh

Sanskaar International School

2019 – 2020

Class X (Percentage: 98%)

Prayagraj, Uttar Pradesh

PROJECTS

Cognitive Overload Detection System | [GitHub](#) | Dec 2025 – Mar 2026

- Built a real-time cognitive overload detection system using **behavioral interaction data**
- Applied **unsupervised learning** using **GMM** for behavior modeling and **Isolation Forest** for anomaly detection
- Engineered features from user activity logs using time-window based aggregation
- Developed a **Streamlit dashboard** for real-time monitoring and visualization of cognitive load

Anemia Detection using Deep Learning | [GitHub](#) | Sep 2025 – Nov 2025

- Developed a **deep learning**-based system to detect anemia from conjunctiva images
- Implemented **transfer learning** using **EfficientNetB0** for binary classification
- Built a **Flask-based backend** to serve model predictions with a simple user interface
- Optimized model performance on a limited dataset using preprocessing and regularization

AI Chatbot for Discord | [GitHub](#) | Oct 2024 – Dec 2024

- Developed and deployed a **Python-based chatbot** for **Discord** to automate user interactions
- Integrated **Google Gemini API** for **natural language processing** to generate context-aware real-time responses

CERTIFICATIONS

Advanced AI and Machine Learning Techniques and Capstone | [Credential](#)

Feb 2026

Microsoft

- Applied advanced **Machine Learning** and **Artificial Intelligence** techniques in model development and evaluation

Data Analytics Foundation | [Credential](#)

Nov 2025

Google

- Developed skills in **data analysis**, **SQL**, and deriving insights for data-driven decision making

Crash Course on Python | [Credential](#)

Aug 2025

Google

- Strengthened proficiency in **Python**, **object-oriented programming**, and problem solving

Introduction to Front-End Development | [Credential](#)

Sep 2025

Meta

- Learned fundamentals of **HTML**, **CSS**, and front-end development

ACHIEVEMENTS

- Finalist **AI Craft 3.0** (national-level AI competition; UG, PG, and PhD participation)
- Selected for **AI & ML Workshop at IIT Delhi**; worked on DeepFace and image recognition projects
- Selected for **Samarambh 2.0** at Microsoft; gained hands-on experience with Microsoft Azure
- Selected for **GDSC Cloud Noida**; worked on concepts related to Agentic AI

SKILLS

Languages : Python, Java, HTML, CSS, JavaScript, ReactJS, SQL, MySQL

Frameworks \ Libraries : TensorFlow, Scikit-learn, OpenCV, Pandas, Matplotlib, NumPy, REST API

Tools \ Technologies : Git, GitHub, Streamlit, Flask, Discord API

Core Concepts : DSA, SDLC, OOP, AI, ML, Deep Learning, Unsupervised & Supervised Learning

Soft Skills : Problem Solving, Analytical Thinking, Leadership
